### Kindergarten

#### Weather and Climate
- **K-ESS2-1.** Use and share observations of local weather conditions to describe patterns over time.
- **K-ESS3-2.** Ask questions to obtain information about the purpose of weather forecasting to prepare for, and respond to, severe weather.
- **K-PS3-1.** Make observations to determine the effect of sunlight on Earth’s surface.
- **K-PS3-2.** Use tools and materials to design and build a structure that will reduce the warming effect of sunlight on an area.

#### Animals, Plants and Their Environment
- **K-LS1-1.** Use observations to describe patterns of what plants and animals (including humans) need to survive.
- **K-ESS2-2.** Construct an argument supported by evidence for how plants and animals (including humans) can change the environment to meet their needs.
- **K-ESS3-1.** Use a model to represent the relationship between the needs of different plants or animals (including humans) and places they live.
- **K-ESS3-2.** Communicate solutions that will reduce the impact of humans on the land, water, air, and/or other living things in the local environment.

### 1st Grade

#### Earth’s Place in the Universe
- **1-ESS1-2.** Make observations at different times of year to relate the amount of daylight to the time of year.

#### Structure, Function, Information Processing
- **1-LS1-1.** Use materials to design a solution to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs.
- **1-LS1-2.** Read texts and use media to determine patterns in behavior of parents and offspring that help offspring survive.
- **1-LS3-1.** Make observations to construct an evidence-based account that young plants and animals are like, but not exactly like, their parents.

#### Waves: Light and Sound
- **1-PS4-1.** Plan and conduct investigations to determine if a design solution works as intended to change the speed or direction of an object with a push or a pull.

### 2nd Grade

#### Processes that Shape the Earth
- **2-ESS1-1.** Use information from several sources to provide evidence that Earth events can occur quickly or slowly.
- **2-ESS2-1.** Compare multiple solutions designed to slow or prevent wind or water from changing the shape of the land.
- **2-ESS2-2.** Develop a model to represent the shapes and kinds of land and bodies of water in an area.
- **2-ESS2-3.** Obtain information to identify where water is found on Earth and that it can be solid or liquid.

#### Ecosystems: Interactions, Energy, and Dynamics
- **2-LS2-1.** Plan and conduct an investigation to determine if plants need sunlight and water to grow.
- **2-LS2-2.** Develop a simple model that mimics the function of an animal in dispersing seeds or pollinating plants.
- **2-LS4-1.** Make observations of plants and animals to compare the diversity of life in different habitats.

#### Biological Evolution: Unity and Diversity
- [i.e. study the range of different living things that exist in each habitat]

#### Structure and Properties of Matter
- **2-PS1-1.** Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties.
- **2-PS1-2.** Analyze data obtained from testing different materials to determine which materials have the properties that are best suited for an intended purpose.
- **2-PS1-3.** Make observations to construct an evidence-based account of how an object made of a small set of pieces can be disassembled and made into a new object.
- **2-PS1-4.** Construct an argument with evidence that some changes caused by heating or cooling can be reversed and some cannot.

### K-2 Engineering
- **K-2-ETS1-1.** Ask questions, make observations, gather information about a situation people want to change to define a simple problem that can be solved through the development of a new or improved object or tool.
- **K-2-ETS1-2.** Develop a simple sketch, drawing, or physical model to illustrate how the shape of an object helps it function as needed to solve a given problem.
- **K-2-ETS1-3.** Analyze data from tests of two objects designed to solve the same problem to compare the strengths and weaknesses of how each performs.
### 3rd Grade

#### Weather and Climate

- **3-ESS2-1.** Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season.
- **3-ESS2-2.** Obtain and combine information to describe climates in different regions of the world.
- **3-ESS3-1.** Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard.

#### Life Cycles and Traits

- **3-LS1-1.** Develop models to describe that organisms have unique and diverse life cycles, but all have in common birth, growth, reproduction, and death.
- **3-LS3-1.** Analyze and interpret data to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms.
- **3-LS3-2.** Use evidence to support the explanation that traits can be influenced by the environment.
- **3-PS2-1.** Plan and conduct an investigation to provide evidence of the effects of balanced and unbalanced forces on the motion of an object.
- **3-PS2-2.** Make observations and/or measurements of an object’s motion to provide evidence that a pattern can be used to predict future motion.
- **3-PS2-3.** Define a simple design problem that can be solved by applying scientific ideas about magnets.
- **3-PS2-4.** Define a simple design problem that can be solved by applying scientific ideas about magnets.

#### Forces and Interactions: Motion and Stability

- **3-PS2-1.** Plan and conduct an investigation to provide evidence of the effects of balanced and unbalanced forces on the motion of an object.
- **3-PS2-2.** Make observations and/or measurements of an object’s motion to provide evidence that a pattern can be used to predict future motion.
- **3-PS2-3.** Ask questions to determine cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other.
- **3-PS2-4.** Define a simple design problem that can be solved by applying scientific ideas about magnets.

### 4th Grade

#### Earth's Systems: Processes that Shape the Earth

- **4-ESS1-1.** Identify evidence from patterns in rock formations and fossils in rock layers to support an explanation for changes in a landscape over time.
- **4-ESS1-2.** Make observations and/or measurements to provide evidence of the effects of weathering or the rate of erosion by water, ice, wind, or vegetation.
- **4-ESS2-1.** Analyze and interpret data from maps to describe patterns of Earth's features.
- **4-ESS2-2.** Generate and compare multiple solutions to reduce the impacts of natural Earth processes on humans.

#### Structure, Function and Information Processing

- **4-PS4-2.** Develop a model to describe that light reflecting from objects and entering the eye allows objects to be seen.
- **4-LS1-1.** Construct an argument that some animals form groups that help members survive.
- **4-LS4-1.** Analyze and interpret data from fossils to provide evidence of the organisms and the environments in which they lived long ago.
- **4-LS4-2.** Construct an argument that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all.
- **4-LS4-3.** Make a claim about the merit of a solution to a problem caused when the environment changes and the types of plants and animals that live there may change.
- **4-PS4-1.** Develop a model to describe patterns in terms of amplitude and wavelength and that waves can cause objects to move.
- **4-PS4-2.** Generate and compare multiple solutions that use patterns to transfer information.

#### Waves and Information

- **4-PS4-3.** Generate and compare multiple solutions that use patterns to transfer information.

#### Energy

- **4-PS3-1.** Use evidence to construct an explanation relating the speed of an object to the energy of that object.
- **4-PS3-2.** Make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents.
- **4-PS3-3.** Ask questions and predict outcomes about the changes in energy that occur when objects collide.
- **4-PS3-4.** Apply scientific ideas to design, test, and refine a device that converts energy from one form to another.
- **4-ESS3-1.** Obtain and combine information to describe that energy and fuels are derived from natural resources and their uses affect the environment.
